# CLEMENS BEVERAGE TECHNOLOGY

50 YEARS OF EXPERIENCE AND CREATIVITY

## HOW IT ALL STARTED

The company's roots date back to the summer of 1952, when three brothers, Bernard, Nikolaus and Matthias Clemens, launched a locksmith and hardware store. Guided by the principle of acting with courage and caution, Bernard Clemens expanded

the business area from 1970 onwards to include manual cellar appliances with his own patents.

In 1975, the partnership with GAI in Italy marked the company's entry into bottling technology, which was further enhanced in 1977 with the

addition of labelling technology from ENOS in Italy.

Over the following years, CLEMENS Technology continued to expand its expertise in cellar technology.

**CLEMENS**  
GETRÄNKETECHNIK

# TECHNOLOGY

## WITH CREATIVITY

The portfolio has gradually been expanded to include tanks from LETINA in Croatia, labeling and capsuling technology from GAI, machines for Champagne production from TDD in France, capping systems for Champagne and wine from ROBINO & GALANDRINO Italy, as well as depalletizing, bottle transport and packag-

ing systems from MAS PACK in Italy. Our long-term collaboration with forward-thinking partners enables us to tailor our solutions to our customers' specific needs, offer cutting-edge technology and provide efficient, high-quality service. To further improve this service, the Beverage Technology department took up

residence in its own company building in 2017. This new facility offers a large assembly hall and an extensive spare parts warehouse. Since 2021, we are operating as an independent company, CLEMENS Getränketechnik GmbH & Co KG.

# CLEMENS BEVERAGE TECHNOLOGY

**50 YEARS OF EXPERIENCE AND CREATIVITY**

## **CUSTOMIZED PLANTS + SERVICE**

For CLEMENS, offering a system involves first understanding the customer's needs and then displaying the potential technical solutions that could meet those needs. It is not primarily about supplying machines; rather, it is about developing a technical solution that adds value for the customer. At CLEMENS, we assemble individual elements to create a comprehensive solution. We act on behalf of our customers as a partner and have had the privilege of accompanying many of them in their development and assisting them in

their growth over the years.

We advise on the purchase of space- and energy-efficient filling and packaging lines and plan customized systems according to your requirements. Our trained technicians install the complete lines or individual machines on site and are also available to you with their extensive expertise for subsequent maintenance or repairs. CLEMENS customers benefit from an efficient on-site service that enables high machine utilization times.

**a mosaic of possibilities**

# OUR COMMITMENT

**Beverage Technology Solutions: Integral, All-Round, Turnkey**

## EFFICIENT, CREATIVE, DYNAMIC

Are you looking to implement a new customized filling, labeling or packaging line? Do you seek to highlight the quality of your product? We are offering comprehensive customer-

oriented advice on efficient planning of an entire line or optimized positioning of individual machines. Our 50 years of experience in automation solutions are for a variety of beverage

ages, including wine, sparkling wine, spirits, liqueurs, fruit juice, water, oil, alcopops, beer and dealcoholized products.

We consult with you to develop the most suitable solution and provide ongoing support throughout the entire process. Based on your performance specifications and samples, we define the design of the machines and use CAD programs to plan the optimum line, taking careful

consideration of your factory layout. Thanks to our extensive experience and reliable collaboration with our renowned partners in beverage technology, we are able to provide the best investment solution, tailored to your company's specific goals.

# FILLING SEALING LABELING

## PERFORMANCE AND RELIABILITY

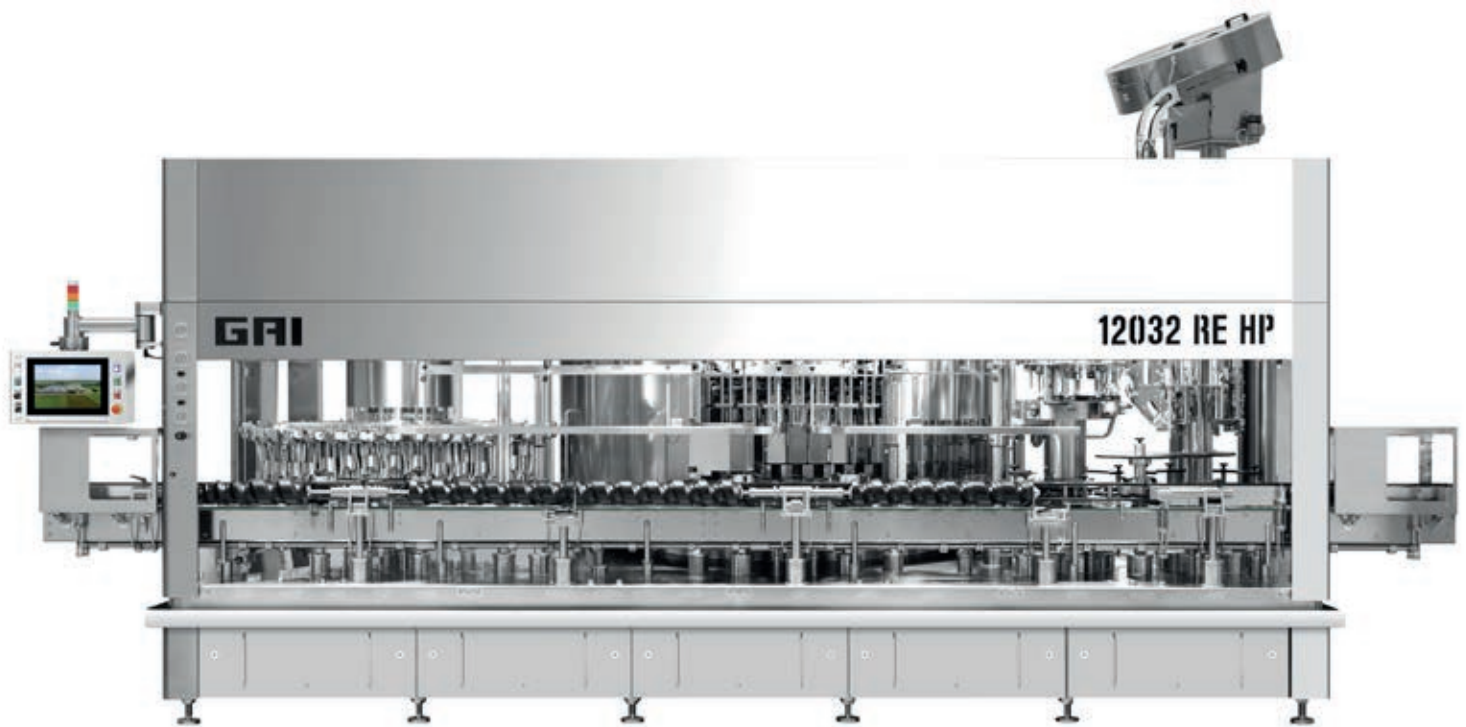

Since 1946, GAI has been developing and producing bottling lines for a wide beverage range, including wine, sparkling wine, semi-sparkling wine, beer, spirits, vinegar, oil, water, juice and beer in bottles or cans. The company is headquartered in Ceresole d'Alba, Italy. GAI is currently one of the world's most prominent

producers of filling and labeling technology for lines with a capacity of up to 15,000 bottles per hour. The filling systems with gravity, overflow or high-performance pressure fillers are characterized by their perfect reductive filling technology. These machines are available as standalone units or in combination

with rinsers and cappers as compact monoblocs. All systems with an output of 4,000 and more bottles per hour are CIP-capable. In addition, GAI offers electro-pneumatic volumetric fillers for beverages in cans, with lid sealers and capacities of 1,000 to 16,000 cans per hour.

### PERFECTLY TUNED HARDWARE

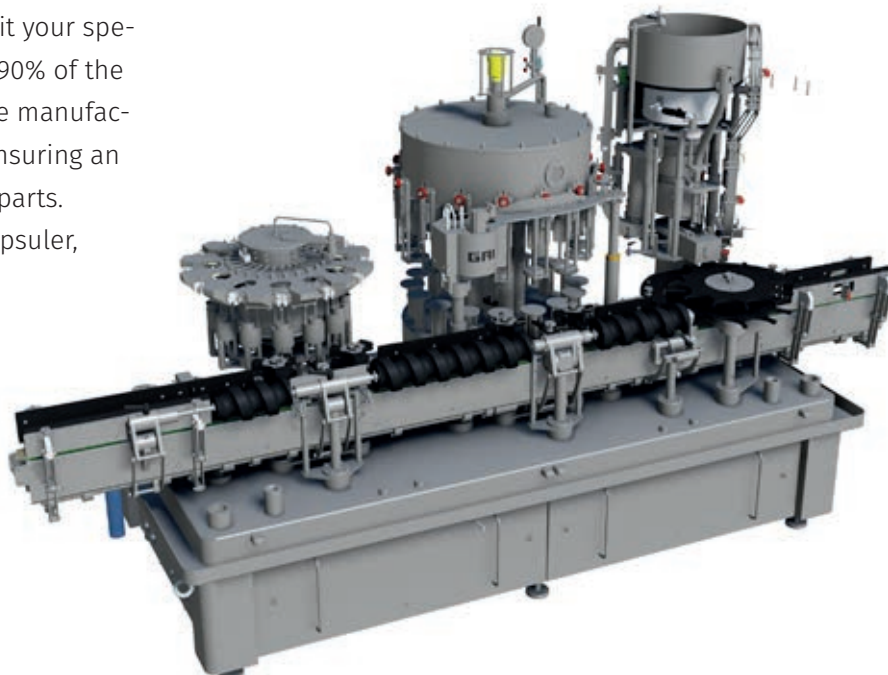

# THE COMPLETION OF BOTTLES

The GAI labeling and capsuling technology rounds off our product range. We offer a range of external bottle washers, labelers and capsule machines with a capacity of 800 to 12,000 bottles per hour. These are available as either individual linear or rotary machines or as compact monobloc versions to suit your specific requirements. Over 90% of the machine components are manufactured in-house by GAI, ensuring an optimal supply of spare parts. The GAI washer-dryer, capsuler,

linear or rotary labeler technology show the further product range we can offer. The machines are running with a capacity of 800 up to 12,000 bottles per hour. They are available as either individual linear or rotary machines or as compact monobloc versions to suit your specific

requirements. Over 90% of the machine components are manufactured in-house by GAI, ensuring an optimal supply of spare parts. Our esteemed long-standing partner enables us to respond specifically to every customer request.

# CLEMENS PARTNER

## DEPALLETIZING – PACKING – PALLETIZING

The renowned Italian company MAS PACK is a dynamic partner dedicated to the development and manufacture of packaging machines and systems.

- Depalletizers and Unpackers
- Bottle conveyors

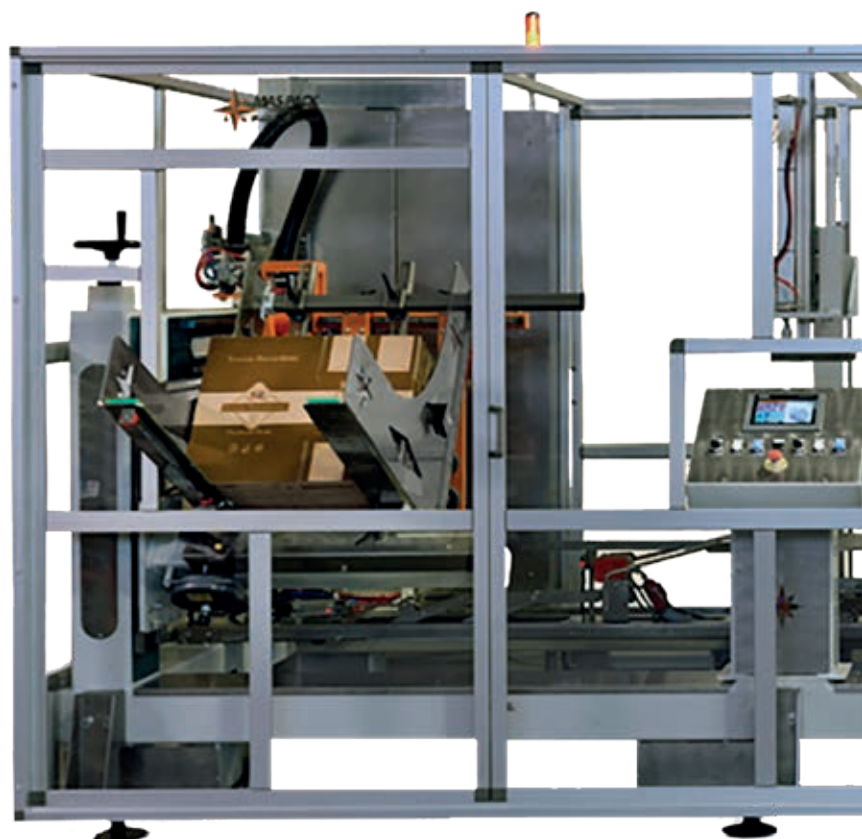

- Carton Erectors
- Packers for standing and for lying bottles
- Inserters
- Carton closers
- Carton conveyors
- Palletizers

MAS PACK offers both line and modular solutions. They also utilize robot technology to create particularly compact systems.

By working with this partner, we can respond specifically to customer requirements.

# CLEMENS PARTNER LETINA

**THE CENTERPIECE OF THE CELLAR: A WELL-PLANNED TANK PLANT**

## TANK SYSTEM

LETINA - is internationally recognized as a manufacturer of stainless steel tanks. In collaboration with our partner, we can provide your cellar with standard tanks or tailor-made storage, fermentation or mixing tanks to suit your requirements. Our tanks are state-of-the-art and available in a range of shapes, including round, cubic and customized designs for

- Wine
- Champagne
- Beer
- Spirits/Liquors
- Water
- Oil/Vinegar
- and many other products.

Our tanks offer the following advantages:

- an extremely stable manhole with controlled fermentation through a heat exchanger plate or double jacket in a U-shape over the entire jacket height (optional);
- excellent suitability for cooling and heating; cooling already starts at the time of filling.

Our product range includes:

- Red wine mash tanks as
  - Horizontal agitator tanks

- Vertical pneumatic mash immersion tanks

- Vertical mash floaters

- Fermentation tanks, round and rectangular
- Ever-full tanks,
- Mixing tanks
- Transport tanks
- Pressure tanks
- Beer tanks
- Walkways
